

Intake and submissions with AURA.

Turn document-led onboarding into a structured, verified workflow. AURA reads, classifies, and cross-verifies every document in the submission against your business-process guidelines, and names every gap and mismatch. A clean file, every time.

Introducing
AURA

INTAKE AND SUBMISSIONS
SPECIALIST

Start from a clean file

A non-individual account-opening submission is not one document, it is a file, and nobody knows the file is incomplete until late. AURA runs intake and submissions end to end, cross-verifying the facts across the whole submission rather than document by document, and handing the decision a complete, traceable file.

Live

At a leading Indian bank, for non-individual business onboarding.

Cited

Every check, mismatch, and rectification cited to your guidelines and recorded.

An AI Coworker for document-led intake

Guideline-grounded, not templated	Cross-verified, not just extracted	A coworker alongside your team
- Configured from your guidelines - Holds up when document sets vary - No fixed template to break	- Classifies and tags every document - Validates across the whole file - Every gap and mismatch named	- Drafts the follow-up for email - Only exceptions reach your team - Hands a clean file to ALEX or LEO

The glass box: five audit pillars

Auditable A glass box, with case lineage you can replay.	Creditable Every check cited to your guidelines.	Zero bias Bias-tested in the pipeline, so the same file yields the same answer.	Hard grounded Grounded to your guidelines and data, with no fabrication.	Configurable oversight The dial is yours to set.
